

Flexible Vinyl Compound (COMPNM)

COMPNM is UV flexible PVC specifically formulated with a non-migrating plasticizer, offering a more durable bond than conventional flexible PVC. Originally developed for the Inflatable Boat Industry, this elastomer is also designed for applications requiring the following properties:

- *Good dimensional stability*
- *UV Resistance*
- *Fungicide added*
- *Matte Finish*
- *Good adhesion properties*
- *High Impact*

Some uses include: Inflatable Boat Bumpers, Rubstrakes, Planing Chafes, and Inflatable Tubes.

Typical Properties	Nominal Value	ASTM Test Method
Specific Gravity	1.34	D-792
Hardness (Shore A)	74	D-2240
Tensile Strength, psi	2900	D-638
100% Modulus, psi	1300	D-638
Elongation, %	415	D-638
